Cleaning and care
Cleaning the coffee machine

To prevent accidental activation of the machine, always switch off the device using the "On / Off" button. Always turn off the machine before cleaning.

Descaling

Descaling is necessary as the mineral content of tap water can cause the water pipes to become clogged. Descaling will extend the life of the machine and improve the taste of the coffee. Descaling instructions are given in the display.

Descaling tablets are available from the Miele Retailer or online at the Miele Shop.

Tips for use

Changing the portion sizes

Changing the portion sizes during drink

Changing the portion sizes in the "Parameters" menu or set it while making a drink.

Calling up and changing portion sizes in the "Parameters" menu
